DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 1/17/2001 has been considered by the examiner.

Oath/Declaration

2. Applicant has not given a post office address anywhere in the application papers as required by 37 CFR 1.33(a), which was in effect at the time of filing of the oath or declaration. A statement over applicant's signature providing a complete post office address is required.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claims 4, 9, 19, 22, and 27, recite the limitation "the then-current". There is insufficient antecedent basis for this limitation in the claims. It is unclear when "then" is

Art Unit: 2134

in this limitation. Line 3 of claim 4 discloses determining whether the request was created within a reasonable time with respect to the then-current time. If "then" is the time of creation, this determining step cannot be understood.

7. The term "reasonable" in claims 4, 9, 19, 22, and 27 is a relative term which renders the claims indefinite. The term "reasonable" is not defined by the claims, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

8. The term "non-encrypted" in claims 1-31 is indefinite because data transferred over Internet Protocol must be encrypted in one way or another. The information is stored as bits that can only be retrieved by one with the correct key or algorithm.

9. The term "H.235 ClearToken" in claims 3, 11, 18, and 26 is indefinite, since it is a trademark. If a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of the 35 U.S.C. 112, second paragraph. *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982) (MPEP 2173.05(u)).

Claim Rejections - 35 USC § 102 or 103

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2134

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 1-31, as best understood, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over admitted prior art.

The claimed invention, as described by the specification, seems to be the same as the admitted prior art, with the substitution of not encrypting the authentication information, as is done in the prior art. Since the claims state comprising, further encrypting the information would read on the claims.

Further, the examiner takes official notice that not encrypting information will lower processing time and security. It would have been obvious to one of ordinary skill in the art to not encrypt the authentication information when a lower level of security is necessary, to lower the processing time.
